B3 Prospects

Global economy is expected to improve but remain on a moderate growth path. While there are indications of more sustained growth in the major economies in 2017, downside risks to global growth continue to prevail, arising from the volatility in commodity prices, policy uncertainties and growth prospects of major developed economies, heightened risk aversions in the global financial markets as well as geopolitical developments.

While the external environment may continue to remain challenging, the Malaysian economy will experience sustained growth with the primary driver being domestic demand. The depreciation of Ringgit Malaysia which resulted in our products being more competitive in the export markets. On the other hand, the weakened Ringgit Malaysia will escalate the costs of doing business domestically arising from costlier imports. The recently volatility in aluminium prices has added further uncertainties to our decision-making process. Nonetheless, the Group will remain vigilant and be well prepared for the challenges ahead. As usual, we will continuously focus on improving cost efficiencies and recovery to mitigate any adverse impacts on our business.

Barring unforeseen circumstances, the Board is optimistic that the Group will remain profitable for the forthcoming quarter.
